

## Pothos and LimeSDR

Danny Webster

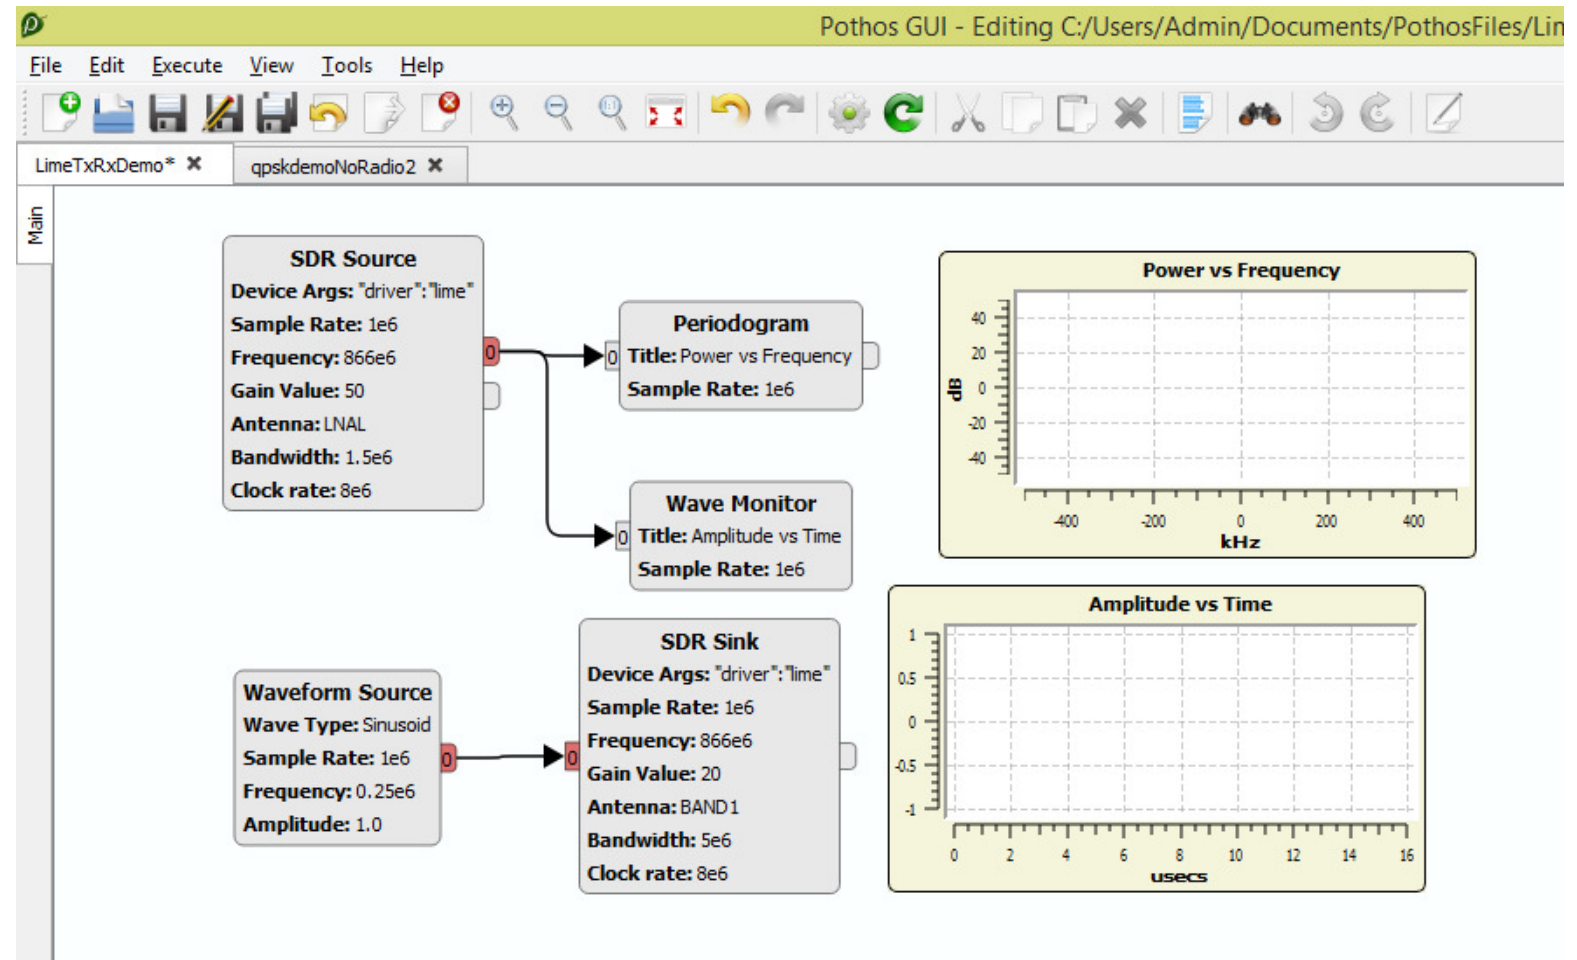

# Pothos and LimeSDR

- **Pothos is Real Time Radio Software**
- **Open Source**
- **Easy to use graphical interface**
- **Minimalist settings for SDR operation**
- **Wide range of blocks readily available**
- **Wide range of inputs and outputs**
  - Audio, Data, Files, IP and LimeSDR
- **Extendable via C++ and Python**

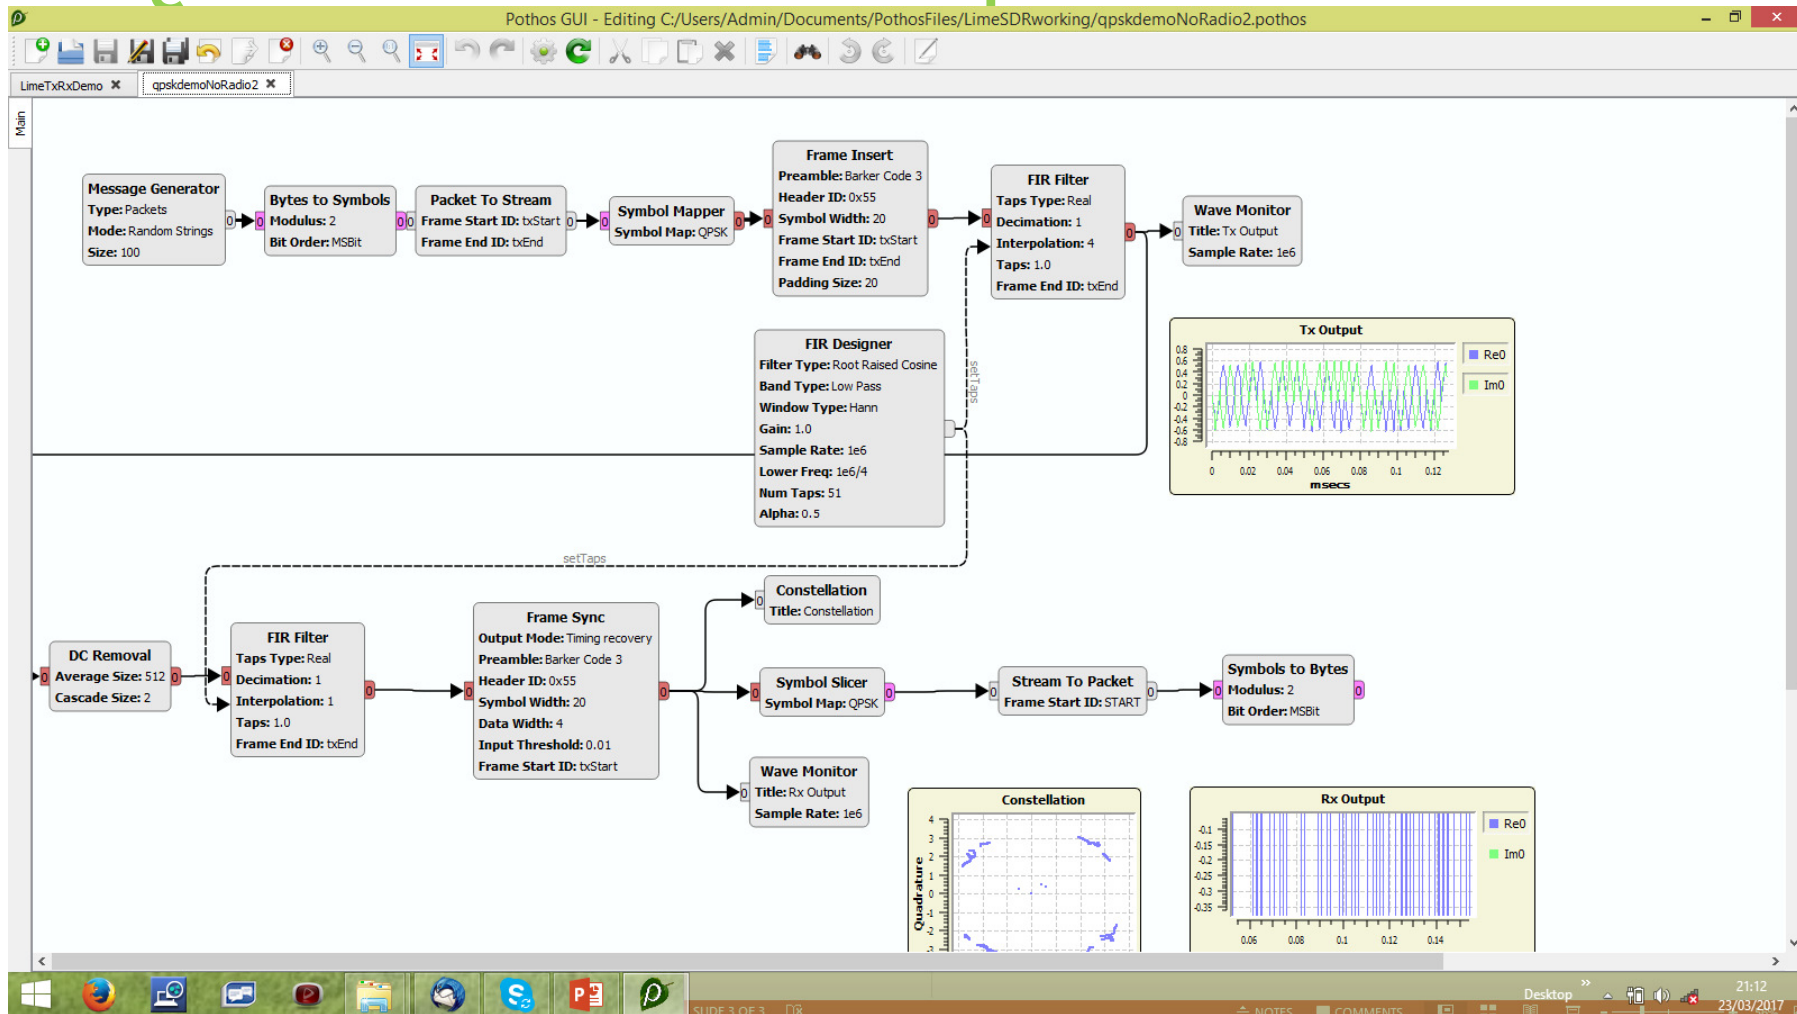

# Pothos LimeTxRxDemo

- Shows Sink and Source operating in same example.
- Example Lime Settings for Sink and Source visible here.

# Pothos QPSK Modem Example

# Allows Graphical Controls
